Introduction

This is the fifth annual report on compliance and enforcement of the *Forest Practices Code of British Columbia Act* (the Code) and its regulations, which came into effect on June 15, 1995. The report gives an objective picture of compliance and enforcement activities from April 1, 1999 to March 31, 2001 of the following year and provides a follow-up to annual reports previously published.

This report contains statistics recorded by the British Columbia Ministry of Forests (MOF) and the Ministry of Environment, Lands and Parks. The report covers compliance and enforcement activities with respect to forest practices carried out by major licencees, small business licencees, woodlot licencees and mining, petroleum and natural gas companies holding licences to cut.

Copies of this report are available from the Ministry of Forests, Compliance and Enforcement Branch, or by accessing the government Internet page: http://www.for.gov.bc.ca/enforce/index.htm. If there are discrepancies between the printed copy or the copy of the Annual Report on the website, the posted copy of the Annual Report on the website is considered correct.

Statistical Summary

The information contained in this report reflects the ministry's fifth year of gathering information about enforcement activities under the Code. The majority of information is generated from the Ministry of Forest's Enforcement Action, Administrative Review and Appeal Computer Tracking System (ERA). The Enforcement Program of the Ministry of Environment, Lands and Parks manages a database of environmental enforcement activities under a range of environmental legislation — including the Code — called the Conservation Officers On-line Reporting System (COORS). COORS can generate reports on activities, either by the type of industrial activity, or by legislation. The statistics of this report were complied by combining the data from ERA and COORS database.

During the period from April 1, 1999 to March 31, 2000, ~~44,869~~* scheduled and unscheduled harvest and road inspections were completed. These inspections identified 1,835 problems/incidents that were dealt with in the field or required further investigation. Of these, 227 are still under investigation, while 1,475 have been the subject of formal or informal measures. Informal measures, such as compliance notices issued by field staff, are useful and practical mechanisms to help avert contraventions and ensure compliance with the Code. Formal measures are used when an official determines that the Code has been contravened and a formal sanction is warranted. It is important to note that the number of administrative remedies specified for the reporting period are subject to revision depending on the outcome of reviews or appeals.

For the reporting period, 52 administrative reviews have been requested under the Code of which 2 have been withdrawn, and 20 appeals have been filed with the Forest Appeals Commission, of which 1 has subsequently been withdrawn. During the period, 36 reviews and 5 appeals were scheduled to be heard. Some of these were requested in a previous reporting period. Since the Forest Practices Code came into force there have been a total of 259 administrative reviews requested of which 19 have been withdrawn. In addition, 105 appeals have been filed with the Forest Appeals Commission, of which 23 have been withdrawn.

*** Subsequent analysis has shown that this number should be 34,046. This will affect any statistic or chart based on inspections or the number of inspections. [June 2, 2004]**

Commonly Asked Questions

What does a contravention mean?

Under the *Forest Practices Code of BC Act*, licencees must comply with "on-the-ground" regulatory requirements. They must follow strict planning rules to ensure timber harvesting, road construction and other forest practices are carried out in a way that will adequately manage and conserve forest resources. Where required by the tenure agreement, licencees must also reforest harvested areas, maintain and deactivate forest roads, and do whatever is necessary to rehabilitate areas that have been disturbed by their activities.

The risk of failure is always borne by the licencees. Any failure to meet a Code requirement — even when the failure is not the licencee's fault — is a contravention. For example, under the Code, a major licencee must reforest harvested areas. Any failure to do so is a contravention of the Code — even if the failure is due to weather, insect infestation, or other factors beyond the licencee's control.

As a result, the question of fault is important in selecting appropriate enforcement actions. If the licencee is not at fault, as in the case of the licencee who fails to reforest an area due to weather or insect infestation, administrative remedies are used to ensure the licencee does not profit from the contravention, and either fixes the problem or compensates the Crown. If the licencee is at fault, administrative remedies can also be used to deter any recurrence.

In cases of serious contraventions licencees may also be prosecuted for an offence.

What are inspections?

Inspections are a review of the "on-the-ground" practices and are used to determine whether the forest practices are carried out in compliance with statutory and contractual requirements.

These inspections cover the obligations of both licencees and the government.

What is monitoring?

Monitoring encompasses activities that focus on the management processes used to promote, assess and enforce compliance, including the assessment of risk, the allocation of inspection resources and the appropriateness of enforcement actions.

Why are audits performed?

Audits are done to assess the effectiveness and enforceability of the forest practice requirements and the efficiency and effectiveness of the Ministry of Forest's compliance and enforcement program.

What does it mean if a licencee is given a monetary penalty?

Monetary penalties are one of the administrative remedies available under the Forest Practices Code of BC Act. The fact that a licencee has been assessed a monetary penalty means that a senior government official has determined that the licencee has failed to meet a requirement of the Code.

Monetary penalties (like other administrative remedies such as stopwork orders and remediation orders) are used to ensure the licencee bears the risk of any failure to meet a Code requirement. They can also be used as a disciplinary measure if the failure to meet the Code is caused by carelessness or misconduct.

However, monetary penalties should not be confused with fines that can be imposed by a Court if a licencee is prosecuted and convicted for an offence.

When are licencees held accountable?

Licencees are always accountable for any contravention of the Code. Any licencee who contravenes the Code — even one whose conduct is entirely blameless — may be required to remedy the contravention or to compensate the Crown for the contravention.

Administrative remedies, including monetary penalties, are used to ensure this is done. In addition, such remedies are used to ensure the licencee does not profit from the contravention.

Finally, if a contravention of the Code occurs as a result of carelessness or misconduct on the part of the licencee, increased monetary penalties can be imposed as a disciplinary measure and the licencee may be denied harvesting rights (this option is often referred to as performance based harvesting). In cases of serious contraventions, the licencee may also be prosecuted for an offence.

When are prosecutions recommended?

Where investigations identify the person(s) responsible:

- for unauthorized harvest,
- of theft,
- of other contravention(s) of the Code,
- is willful or significantly negligent,
- is a repeat offender, or
- has caused significant damage.

Prosecutions are also recommended when it is in the public interest to prosecute, and it is common for either the ministry or RCMP to recommend to Crown Counsel that the person(s) be prosecuted. The final decision as to whether or not to prosecute lays solely with the Crown Counsel (the Ministry of Attorney General).

What is a violation ticket?

A violation ticket is a form of prosecution. Tickets carry set fines for specified offences and once a ticket has been issued no other form of prosecution for the offence for which the ticket was issued can occur.

Due diligence and officially induced errors are defences for violation tickets.

What are the unauthorized harvest statistics?

Since the Code was implemented, there have been 488 monetary penalties levied for unauthorized harvest of crown timber.

Penalties for unauthorized harvesting range up to $234,837.36, and total up to $3,628,509.32. During the same period, there have been 154 Violation Tickets issued by the Ministry of Forests for various incidents of unauthorized harvesting, with fines totalling $24,850.00.

Violation Tickets and Administrative Penalties Summary

Violation tickets issued during reporting period Monetary amount of tickets during reporting period	154 $24,850
Violation tickets issued since June 15, 1995 Monetary amount of tickets since June 15, 1995	824 $135,725
Administrative penalties levied during reporting period Monetary amount of penalties during reporting period	145 $363,949
Administrative penalties levied since June 15, 1995 Monetary amount of penalties since June 15, 1995	1,071 $5,071,723

The above table provides a summary of the total monetary value of penalties and violation tickets issued under the Code by the Ministry of Forests.

Compliance and Enforcement Statistics for the Forest Practices Code

APRIL 1, 1999 - MARCH 31, 2000

The following compliance and enforcement statistics represent a snapshot in time. The ERA database is updated daily to reflect the most current information. Consequently, the figures in this report reflect information current to April 30, 2001 respecting incidents that occurred between April 1, 1998 and March 31, 2000.

The table on the next page summarizes all Code related compliance and enforcement activity reported by the Ministry of Forests and Ministry of Environment, Lands and Parks (MELP) that took place during the reporting period. The following notes give more details about the four "circles" on the chart.

A Unscheduled inspections are conducted to address potential contraventions identified by MOF staff or reported by other agencies or the public.

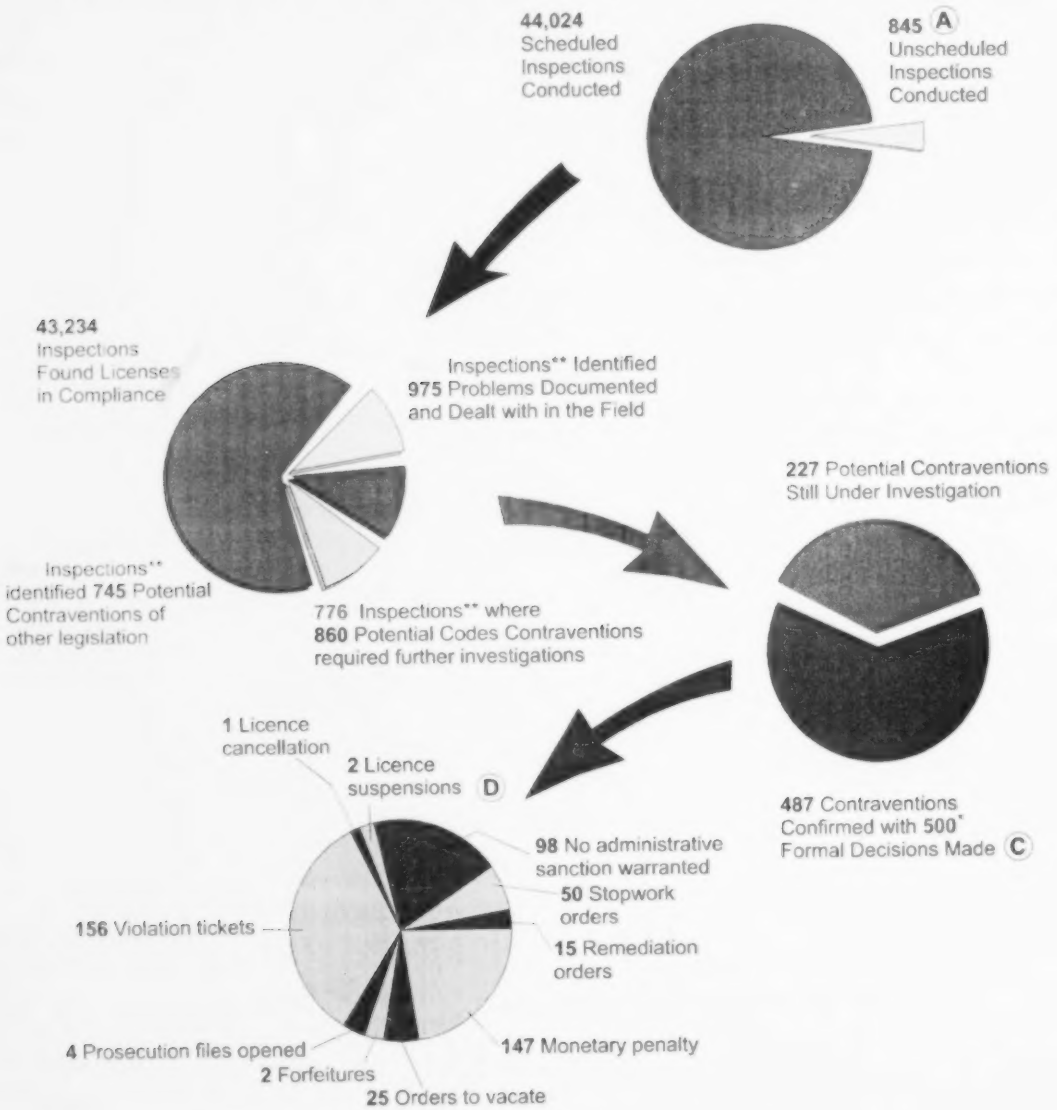
B An inspection may identify both problems dealt with in the field and potential Code contraventions requiring further investigation.

C An inspection may identify one or more potential contraventions of the Code. Also, some inspections are conducted as follow-ups to monitor compliance with instructions, etc.

D One contravention may result in more than one formal decision being made. Alternatively, several contraventions may be addressed through a single formal decision.

Inspection Statistics Table

(Includes information from MELP and Ministry of Forests)

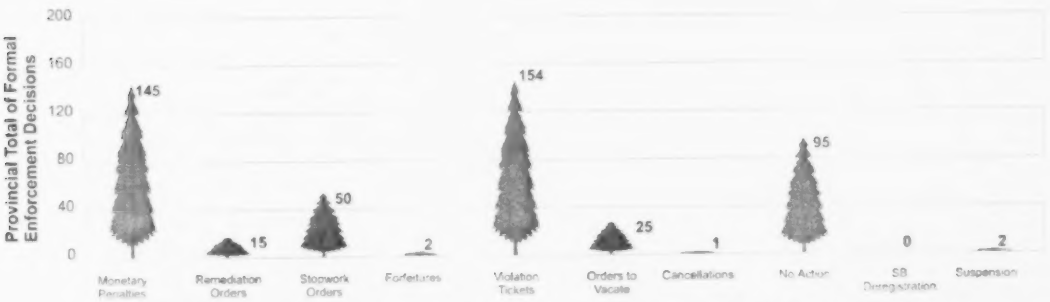


* Note: The table does not include any prosecutions or tickets issued by other agencies, however, any tickets are identified in Appendix 2.

** Some non-compliant inspections are in more than one category.

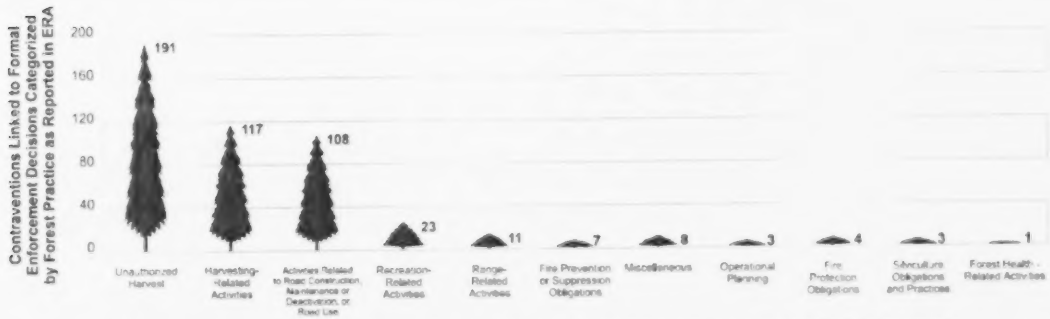
Program Statistics

Provincial Total of Formal Enforcement Decisions



This table shows the frequency of formal enforcement decisions made to address contraventions.

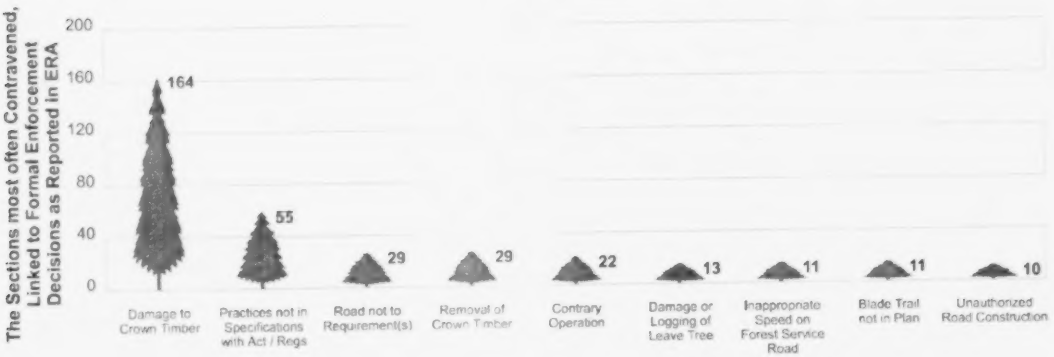
Contraventions Linked to Formal Enforcement Decisions Categorized by Forest Practice as Reported in ERA



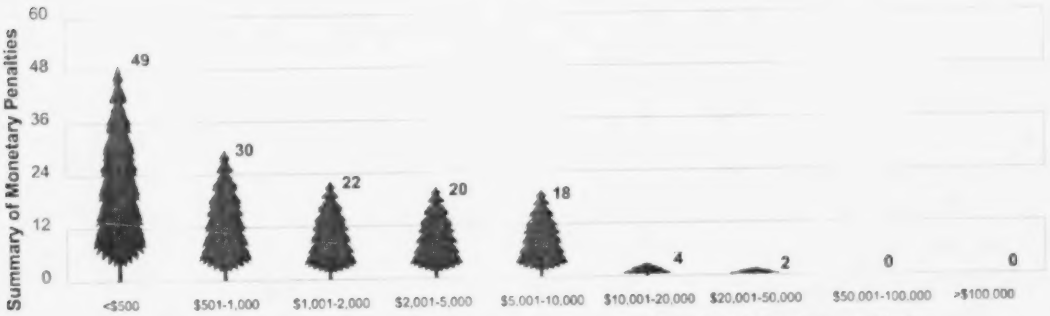
This table provides a roll-up by contravention type. Contravention type is determined by the forest practice referred to in the legislation.

Note: there is no direct correlation between the number of contraventions and the number of decisions made. For example, one incident of unauthorized harvesting may result in a stopwork order and a remediation order, the forfeiture of the timber involved, and the levying of a monetary penalty. Other incidents involving numerous contraventions may be dealt with by levying a single monetary penalty.

The Sections Most Often Contravened, Linked to Formal Enforcement Decisions as Reported in ERA



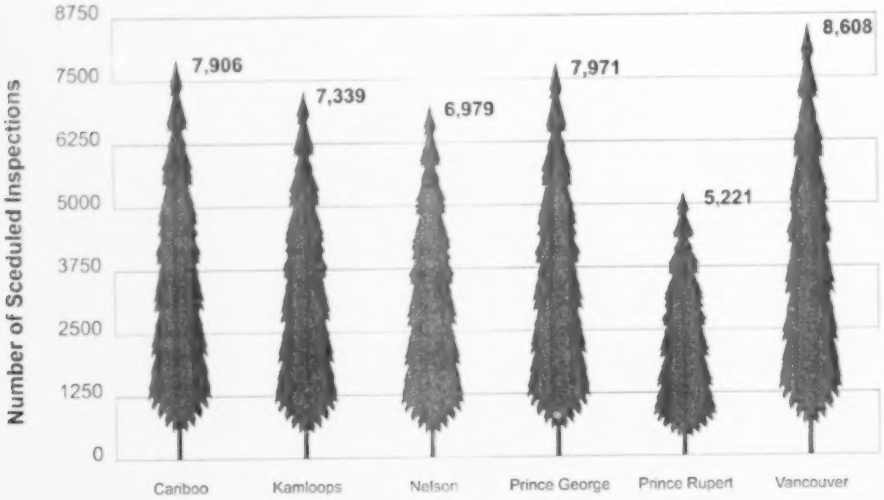
Summary of Monetary Penalties



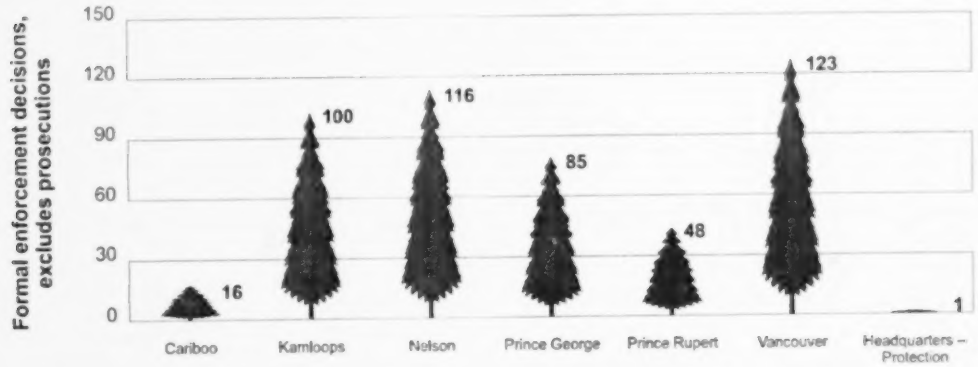
This table shows the number and range of monetary penalties that have been levied under the Code for the reporting period of April 1, 1999 to March 31, 2000.

Regional Inspections, Code Contraventions and Formal Enforcement Decisions

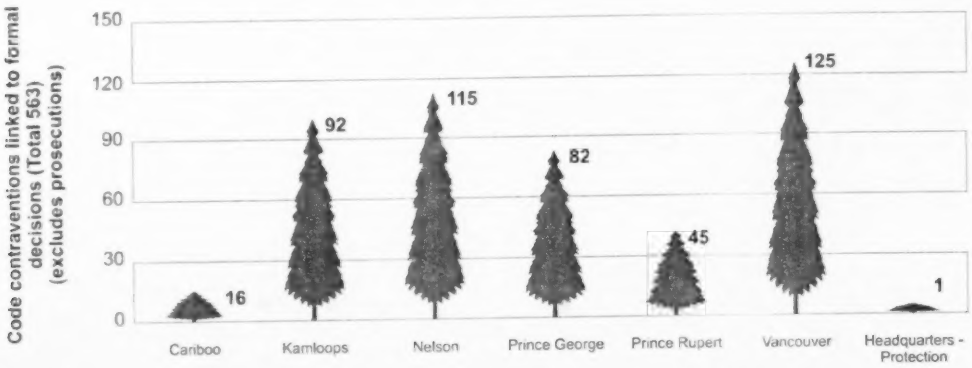
The province is divided into six administrative units called forest regions, each of, which is further sub-divided into between five to nine forest districts. (See Appendix 4 for a map of the boundaries).



This first table lists, by forest region, the number of scheduled inspections conducted in harvesting, range and road related activities which were recorded in the ministry ERA database.



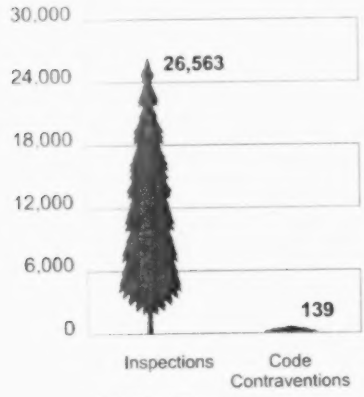
This second table shows the number of Code contraventions in each region as well as for Headquarters -Protection which have resulted in formal enforcement decisions.



The third table shows, by region, the number of formal enforcement decisions made on contraventions. As previously mentioned, there is not a one-to-one relationship between the number of contraventions determined and the number of formal decisions made. Note: both the second and third tables relate to decisions that may be subject to review and appeal. Therefore, the numbers shown may change over time to reflect the outcome of the review and appeal process.

Inspections and Code Contraventions by Tenure Type

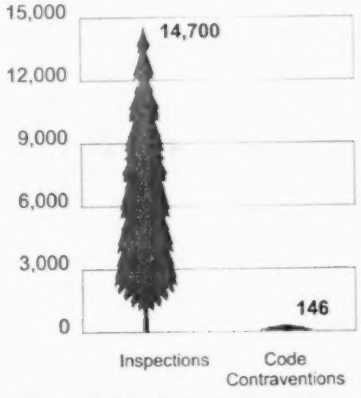
These tables show by tenure group the number of scheduled inspections conducted, and the number of Code contraventions confirmed by formal decisions.



Major Tenures

(volume billed - 59,655,866 cubic metres)

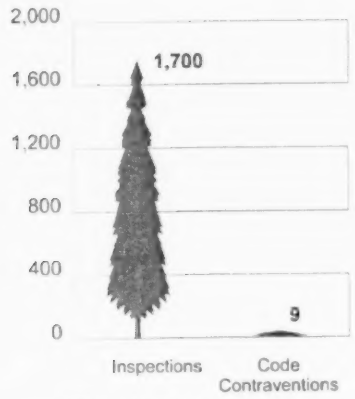
- Tree farm licences
- Timber licences
- Forest licences
- Pulpwood agreements
- Major timber sale licences



Small Business Tenures

(volume billed - 9,972,225 cubic metres)

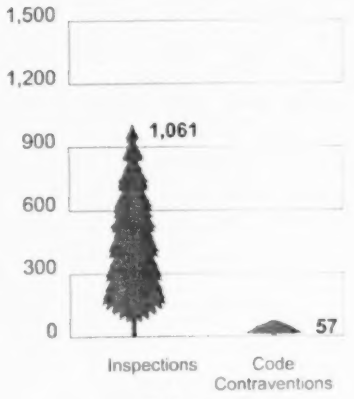
- Competitive timber sale licences
- Value-added timber sale licences
- Direct award timber sale licences
- Roads associated with small business tenures



Woodlot Licences/ Community Forest Agreements

(volume billed - 1,059,893 cubic metres)

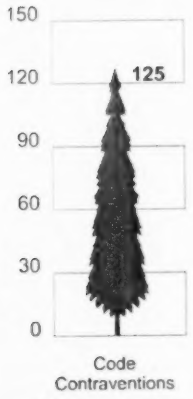
- Woodlot licences and their associated roads



Other

(volume billed - 476,428 cubic metres)

- Licences to cut
- Special use permits
- Free use permits
- Christmas tree permits
- Private lands
- Grazing permit/licence



**Non-tenure

(no volume)

- Road use permit
- Log salvage

The Ministry of Forests tracking systems do not consistently track all inspections carried out on "other" forest related activities, therefore this number is approximate.
** Non-tenure reflects those contraventions attributed to individuals or organizations that do not have a tenure. Contravention examples include damage/removal of Crown timber, exceeding the maximum 14-day stay at a recreation site, and disobeying a control device.

APPENDIX 1

Contraventions and Associated Formal Enforcement Decisions for Major Licencees

APRIL 1, 1999 – MARCH 31, 2000

The following compliance and enforcement statistics represent a snapshot in time. The ERA database is dynamic and is updated daily to reflect the most current information. Consequently, the figures in this report reflect information current to May 5, 2001. The appendix includes an update on investigations in previous reports which are now concluded as well as incidents that occurred between April 1, 1999 and March 31, 2000. All decisions shown as under review or appeal are subject to change.

Shown in alphabetical order are Licencees who are forest companies with major licences that billed volumes of more than 5 000 cubic metres annually.

The header bar lists the licencee, the amount of Crown timber attributed to the licencee, the number of compliance inspections as recorded in ERA, and the number of contraventions as determined by a senior official or as determined by an official through the issuance of a violation ticket. Where the contravention is under either a review or appeal, the case is shown in red and identified with a footnote.

Confirmed contraventions can include a monetary penalty, remediation order, suspension, cancellation or an allowable annual cut reduction. An alleged contravention such as a stopwork order or forfeiture, does not constitute a finding of a contravention. Stopwork orders are listed separately in the tables to reflect this.

		FPC 64 2	Improper deactivation	Penalty
		RDS 20	Fail temporary road deactivation	Penalty

APPENDIX 2

Summary of Contraventions and Associated Formal Enforcement Decisions for Small Business and Woodlot Licencees

APRIL 1, 1999 – MARCH 31, 2000

SMALL BUSINESS TENURES

74 Licencees with 1 Contravention
16 Licencees with 2 Contraventions
2 Licencees with 3 Contraventions
3 Licencees with 4 Contraventions
1 Licencee with 5 Contraventions
1 Licencee with 8 Contraventions
1 Licencee with 9 Contraventions

Contravention	Description	Total
FFPS 34 3	Late hazard abatement	1
FPC 54 2	Unpermitted Road Use	1
FPC 54 3	Unauthorized road use	1
FPC 58 2	Unauthorized road construction	2
FPC 60 1	Unapproved road construction	1
FPC 62 1	Road not to requirement	13
FPC 63 2	Fail to maintain road	1
FPC 63 3	Fail to maintain road	1
FPC 64 1	Fail to deactivate road	1
FPC 65	Unauthorized connection	2
FPC 67	Contrary operation	8
FPC 67 1	Practices not in specifications	18
FPC 67 2	Damage/log leave tree	3
FPC 67 2	Unauthorized practices near stream	2

FPC 68	Unauthorized trail construction	1
FPC 68 1	Bladed trail not in plan	3
FPC 74 1	Irregular range use	1
FPC 74 1	Range use not in plan	1
FPC 76 4	Fire against regulation	1
FPC 96 1	Damage Crown timber	47
FPC 96 2	Remove Crown timber	11
FPC 102 1	Unauthorized construction	1
FPC 154 B	Fail to comply with requirement	1
RDS 12 1	Unauthorized stream crossing	1
RDS 12 1	Equipment within 5m of stream	1
RDS 13 1	Fail to meet drainage patterns	4
